Re : Property ID N305DB

This airframe was purchased as part of a package of parts for resale. It was purchased under our valid **California resale certificate 013845524**. Many of the parts and equipment included have been sold already, and the aircraft needs various substantial parts to ever get flying again. We are currently working on finding these parts.

We have purchased several airframes over the past years to refurbish and resell and have been granted an exemption on these also. Most recently:

Letter ID - L0007284858
Case ID - 2157173
N1433W

And we are currently concluding the sale of Property ID N341ZL, which was also granted an exemption, to a buyer in Australia.

There are no flight logs as it was never in a usable condition, missing many parts and servicable engine.

If you have any questions please don't hesitate to contact us.
